

UNISYN

A division of GE Healthcare

Probe Care Solutions Smart Repair

Evidence shows that more than 70% of ultrasound equipment failures are probe related¹. Maintenance of each probe is essential to ensure that your ultrasound equipment is running as expected.

Do you have any doubts about performance of one of your probes? Is it showing wear?

Unisyn can provide you with a range of diagnostic, repair and exchange solutions to support your daily ultrasound activity.

SMART REPAIR

supports your ultrasound practice by helping you

Maximize continuity of your clinical activity

We provide probe care services across all major probes manufacturers and can provide you with a loaner, while your defective equipment is being taken care of.

Achieve cost savings in maintenance

Unisyn provides you with efficient probe care solutions, which can be adapted to your budget needs. Did you know that probe repair can provide up to 60% savings compared to probe exchange?

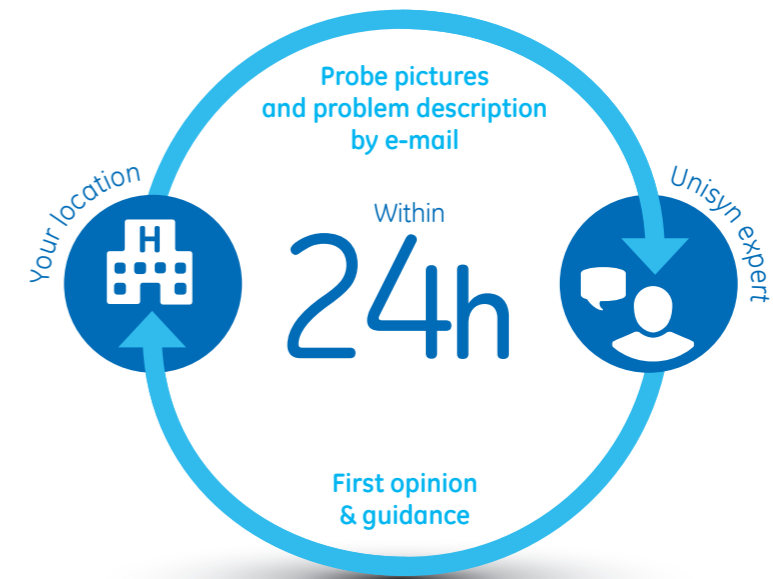

Increase confidence in your diagnosis

Unisyn experts, befitting from over 15 years of experience, perform an in-depth inspection of your probe before it is repaired. Post-repair inspection is performed, to ensure your probe meets OEM specifications.

Benefit from free "Check Your Probe" service.

Any doubt about the level of performance of one of your probes? Try the check your Probe free service. Contact us at the "check your probe" email address, available at the back of this document.

High quality multi-brand repair

Unisyn ultrasound probe maintenance service combines the expertise of a global diagnostic equipment manufacturer with the flexibility of a multi-brand support service. We receive your damaged probes in our ISO 9001 and ISO 13485 certified repair center in Europe, where they go through a comprehensive test bench to qualify failures before they are repaired by our experts.
